REFRACTION POLICY

Refraction is the process of determining the optimal eyeglass prescription for your eyes. This is not only to allow us to prescribe glasses, but MORE IMPORTANTLY to determine how well you can see. This helps in distinguishing problems caused by poor focus (glasses) from problems caused by eye disease.

A refraction may or may not be performed at the time of your visit, depending on our doctor's judgment of its necessity. This service is not covered by Medicare or private insurance companies, and if it is performed there will be a fee of **\$30.00**, which must be paid at the end of your visit, **if you want a prescription for glasses.**

I have read and understand the office policy on refraction. I also understand that this policy will apply to all my future visits.
